Abstract: Environmental issues are extremely relevant. In the current critical ecological environment, all kinds of actions aimed at overcoming the negative tendencies in the use of natural resources are up to date, necessary and obligatory. Providing the energy needed by society is one of the most important and controversial issues of our time, given the resource and environmental constraints. Investments in energy efficiency and increased energy savings are one of the pillars of sustainable energy supply. The purpose of the session would be to bring together specialists from various suburbs to exchange and share experience in this public problem.

List of topics:

- Green building
- Renewable energy
- Climate change and environment protection
- Energy System Sustainability

Submission : The submission and reviews will be handled through the Easy Chair conference management system <https://easychair.org/conferences/?conf=icalt2019>

Manuscript length: 6 pages maximum. This is a strict limit for initial submission. During final submission of accepted papers, authors may purchase extra pages if they find it necessary to address the concerns of the reviewers.

Single blind reviewing: ICALT follows a single-blind review process. Authors are required to include their names and affiliations in their papers as illustrated in the sample templates. Templates (Microsoft Word and LaTeX) can be found at the following
